

Established in 1973, BATTOCCHIO, started his business, producing special resistive tracks for radio and TV reception. The industrial process involved the layered application of carbon graphite and silver conductive film.

Moreover, BATTOCCHIO became highly specialized in professional graphic, therefore in the early 80's has started to produce manufacturing membrane keyboards for automation systems and personalized electronic control equipment.

Thanks to the professional staff and also thanks to the close cooperation with customers, BATTOCCHIO is able to offer really competitive and qualified products. Nowadays the products must be user-friendly and perfectly suited to the market demands.

BATTOCCHIO has the knowledge to give the ensure the best solution in electronic and mechanical fields and to supply turnkey solutions to the customers.

BATTOCCHIO's products include every type of Industrial Keyboards.

The company have 30 years of experience in the productions of MEMBRANE KEYBOARDS, that still are considered as the quality and technology leader.

In 2007, BATTOCCHIO has started to work with CAPACITIVE TRANSPARENT KEYBOARDS

Currently it's one of the few company in the world that can design and produce TRANSPARENT CUSTOM ELECTRODS, for small and medium orders, with very low lead time

All the products that BATTOCCHIO sell are developed and produced in Italy.

The business of BATTOCCHIO is localized basically in Europe, involving more then one thousand different customers that the company has secured during more then 40 years of great business

### Our Features

- designing
- production
- fast prototypes
- no minimum quantity
- best quality
- advance technology
- uni en iso 9001:2010 certificated

### Custom Products

- membrane keyboard
- capacitive keyboard
- inductive keyboard
- tactile feedback
- backlighting
- rigid printed circuits
- plastic case
- turnkey solutions
